

Motivation letter

I was very glad when I saw this particular opportunity to apply for a Master's program in Mathematics. Herein, I would like to express my strong motivation for this master's course. I was graduated at the Menoufia University, Faculty of Science holding a BSc degree in Mathematics, where I was able to get a solid knowledge in this field. I hold a special interest in the dynamic equation on time scales, and I would like to proceed with a specialization in this particular area.

After a careful overview of the master's program, offered by Missouri University, I believe that curricula fully suit my interest, and therefore I would like to get an opportunity to join with this program.

Therefore, I will be very grateful to be provided with this program to improve my education, incen^t my career prospects and knowledge gain. Studding at your University is an extraordinary career opportunity, and therefore I would be very glad if you could support me.

Earlier, I contacted Prof Martin bohner for his support and he guide me to apply officially at the web site. I prefer to get him as a supervisor and working with him. Regarding the fees of joining the MSc degree, I am wondering if I can work as a teaching assistant to solve this issue because I have no fund to cover my fees.

Once again I'm grateful for considering my application and I look forward to a favorable reply.

Sincerely

Rania Attia Muhammad, BSc in Mathematics

Menoufia University, Egypt
